

supermod::docParamName

```
classDiagram
    class supermod {
        docParamName
    }
    class ParamNameSub {
        + __init__()
    }
    ParamNameSub --|> supermod
```

The diagram illustrates a class hierarchy. The base class, 'supermod::docParamName', is shown in a white box with a black border. It has two empty rectangular sections below its name. The derived class, 'doxyxml.generated.compound.doc ParamNameSub', is shown in a grey box with a black border. It contains the method '+ __init__()' in its bottom section. A blue arrow with a hollow triangular head points from the derived class to the base class, indicating inheritance.

doxyxml.generated.compound.doc
ParamNameSub

+ __init__()
