

supermod::childnodeType

```
classDiagram
    class supermod {
        <<childnodeType>>
    }
    class doxygen {
        <<generated>>
        class compound {
            <<childnodeTypeSub>>
            + __init__()
        }
    }
    doxygen.compound.childnodeTypeSub --|> supermod
```

The diagram illustrates a class hierarchy. At the top is the 'supermod::childnodeType' class, represented by a white box with a black border and two empty internal compartments. Below it is the 'doxygen.generated.compound.childnodeTypeSub' class, represented by a grey box with a black border and three compartments. The top compartment of the grey box contains the class name. The bottom compartment contains the method signature '+ __init__()'. A blue arrow with a hollow triangular head points from the top compartment of the grey box to the bottom edge of the white box, indicating inheritance.

doxygen.generated.compound.childnode
TypeSub

+ __init__()
