

supermod::docEntryType

```
classDiagram
    class supermod_docEntryType["supermod::docEntryType"]
    class doxygen_generated_compound_docEntryTypeSub["doxygen.generated.compound.docEntryTypeSub"]
    doxygen_generated_compound_docEntryTypeSub --|> supermod_docEntryType
```

The diagram illustrates a class hierarchy. At the top is the base class 'supermod::docEntryType', represented by a white box with a black border and two empty internal compartments. Below it is the derived class 'doxygen.generated.compound.docEntryTypeSub', represented by a gray box with a black border and three compartments. The first compartment of the derived class contains the class name. The third compartment contains the method '+ __init__()'. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.

doxygen.generated.compound.doc
