

supermod::refTextType

```
classDiagram
    class supermod_refTextType["supermod::refTextType"]
    class doxygen_generated_compound_refTextTypeSub["doxygen.generated.compound.refTextTypeSub"]
    doxygen_generated_compound_refTextTypeSub --|> supermod_refTextType
```

The diagram illustrates a class hierarchy. At the top is the base class 'supermod::refTextType', represented by a white box with a thin black border. Below it is the derived class 'doxygen.generated.compound.refTextTypeSub', represented by a grey box with a thick black border. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains the method signature '+ __init__()'.

doxygen.generated.compound.ref
