

tagged\_stream\_block

```
classDiagram
    class tagged_stream_block {
    }
    class gr_radars_static_target_simulator_cc {
        + setup_targets()
        + make()
    }
    gr_radars_static_target_simulator_cc --|> tagged_stream_block
```

The diagram illustrates a class hierarchy. At the top is the 'tagged\_stream\_block' class, represented by a white box with a black border and two empty internal compartments. Below it is the 'gr::radar::static\_target\_simulator\_cc' class, represented by a grey box with a black border and three compartments. The top compartment of the grey box contains the class name. The bottom compartment contains two methods: '+ setup\_targets()' and '+ make()'. A blue arrow with an open triangular head points from the top edge of the grey box to the bottom edge of the white box, indicating that 'gr::radar::static\_target\_simulator\_cc' inherits from 'tagged\_stream\_block'.

gr::radar::static\_target  
\_simulator\_cc

+ setup\_targets()  
+ make()
