

supermod::docTocItemType

```
classDiagram
    class supermod_docTocItemType["supermod::docTocItemType"]
    class doxygen_generated_compound_docTocItemTypeSub["doxygen.generated.compound.docTocItemTypeSub"]
    doxygen_generated_compound_docTocItemTypeSub --|> supermod_docTocItemType
```

The diagram illustrates a class hierarchy. At the top is the base class 'supermod::docTocItemType', represented by a white box with a black border. Below it is the derived class 'doxygen.generated.compound.docTocItemTypeSub', represented by a gray box with a black border. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains the method '+ __init__()'. The base class box is also divided into three horizontal sections: the top section contains the class name, and the two lower sections are empty.
