

supermod::listofallmembersType

```
classDiagram
    class supermod_listofallmembersType["supermod::listofallmembersType"]
    class doxyxml_generated_compound_listofallmembers_TypeSub["doxyxml.generated.compound.listofallmembers TypeSub"]
    doxyxml_generated_compound_listofallmembers_TypeSub --|> supermod_listofallmembersType
```

The diagram illustrates a class hierarchy. At the top is the base class 'supermod::listofallmembersType', represented by a white box with a thin black border. Below it is the derived class 'doxyxml.generated.compound.listofallmembers TypeSub', represented by a grey box with a thick black border. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains the method '+ __init__()'. The base class box is also divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty.

doxyxml.generated.compound.listofallmembers
