

supermod::docListItemType

```
classDiagram
    class supermod_docListItemType["supermod::docListItemType"]
    class doxygen_generated_compound_doc ListItemTypeSub["doxygen.generated.compound.doc ListItemTypeSub"]
    supermod_docListItemType <|-- doxygen_generated_compound_doc ListItemTypeSub
```

The diagram illustrates a class hierarchy. At the top is the base class 'supermod::docListItemType', represented by a white box with a black border. Below it is the derived class 'doxygen.generated.compound.doc ListItemTypeSub', represented by a gray box with a black border. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains the method '+ __init__()'. The base class box is also divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty.

doxygen.generated.compound.doc
