

DoxygenType

```
classDiagram
    class DoxygenType {
    }
    class DoxygenTypeSub {
        +__init__()
        +find_compounds_and_members()
    }
    DoxygenTypeSub --|> DoxygenType
```

The diagram illustrates a class hierarchy. At the top is the 'DoxygenType' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. A blue arrow with an open triangular head points upwards from the 'DoxygenTypeSub' class to the 'DoxygenType' class, indicating inheritance. The 'DoxygenTypeSub' class is located below and is represented by a shaded rectangle with three horizontal compartments. The top compartment contains the fully qualified class name 'doxygenml.generated.index.DoxygenTypeSub'. The middle compartment is empty. The bottom compartment contains two methods: '+ __init__()' and '+ find_compounds_and_members()'. The entire diagram is set against a plain white background.

doxygenml.generated.index.
DoxygenTypeSub

+ __init__()
+ find_compounds_and
_members()
