

supermod::linkedTextType

```
classDiagram
    class supermod_linkedTextType["supermod::linkedTextType"]
    class doxygen_generated_compound_linkedTextTypeSub["doxygen.generated.compound.linkedTextTypeSub"]
    doxygen_generated_compound_linkedTextTypeSub --|> supermod_linkedTextType
```

The diagram illustrates a class hierarchy. At the top is the base class 'supermod::linkedTextType', represented by a white box with a thin grey border. Below it is the derived class 'doxygen.generated.compound.linkedTextTypeSub', represented by a grey box with a thick black border. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains the method signature '+ __init__()'. The base class box is also divided into three horizontal sections, with the top section containing the class name and the other two being empty.

doxygen.generated.compound.linked
