

SoapySDR::ConverterRegistry  
::listAvailableSourceFormats

```
graph RL; main --> printInfo; printInfo --> SoapySDR_registry[SoapySDR::ConverterRegistry::listAvailableSourceFormats];
```

The diagram illustrates a call graph with three nodes. The node on the left, labeled 'SoapySDR::ConverterRegistry::listAvailableSourceFormats', is shaded gray and has a black border. The middle node, labeled 'printInfo', is white with a black border. The node on the right, labeled 'main', is also white with a black border. A blue arrow points from 'main' to 'printInfo', and another blue arrow points from 'printInfo' to 'SoapySDR::ConverterRegistry::listAvailableSourceFormats'.
