

supermod::docTocListType

```
classDiagram
    class supermod_docTocListType["supermod::docTocListType"]
    class doxyxml_generated_compound_docTocListTypeSub["doxyxml.generated.compound.docTocListTypeSub"]
    doxyxml_generated_compound_docTocListTypeSub --|> supermod_docTocListType
```

The diagram illustrates a class hierarchy. At the top is the base class 'supermod::docTocListType', represented by a white box with a black border. Below it is the derived class 'doxyxml.generated.compound.docTocListTypeSub', represented by a gray box with a black border. A blue arrow with a hollow triangular head points from the derived class to the base class, indicating inheritance. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains the method '+ \_\_init\_\_()'. The base class box is also divided into three horizontal sections, with the top section containing the class name and the other two sections being empty.
